

**THE REVOLUTIONARY GOVERNMENT OF ZANZIBAR
MINISTRY OF EDUCATION AND VOCATIONAL TRAINING**

EDUCATION STATISTICAL ABSTRACT

2026

Foreword

I am pleased to present the Zanzibar Education Statistical Abstract 2026, which provides a comprehensive overview of key education statistics and trends across all levels of education in Zanzibar. This publication serves as an important reference for policymakers, planners, development partners, researchers, education practitioners, and the general public by providing reliable data to support evidence-based planning, decision-making, monitoring, and evaluation of the education sector.

The statistics presented in this Abstract reflect the continued efforts of the Revolutionary Government of Zanzibar to improve access, equity, quality, and efficiency in education. The data cover various aspects of the education system, including enrolment, teachers, schools, examination performance, technical and vocational education, higher education, adult education, and other key indicators that help measure progress towards national development goals and international commitments.

Over the years, Zanzibar has made significant strides in expanding educational opportunities and strengthening the quality of learning. These achievements have been made possible through the commitment of the Government, education stakeholders, communities, and development partners who continue to support the implementation of education programmes and reforms. The information contained in this publication highlights both the progress achieved and the challenges that remain, thereby providing a valuable basis for future interventions and resource allocation.

I would like to express my sincere appreciation to all institutions, schools, departments, agencies, and individuals who contributed to the collection, validation, analysis, and compilation of the data presented in this Statistical Abstract. Their dedication and cooperation have been instrumental in ensuring the quality and credibility of the information contained herein.

I also wish to extend special gratitude to our development partners for their continued support to the education sector in Zanzibar. In particular, I acknowledge the valuable contributions of the World Bank, UNICEF, and Milele Zanzibar Foundation, whose technical and financial assistance has significantly strengthened education planning, data management systems, monitoring and evaluation, teacher development, school improvement initiatives, and efforts to improve learning outcomes for all children. Their

partnership remains vital in advancing Zanzibar's vision of providing inclusive, equitable, and quality education for all.

As we continue to strengthen the education system, I encourage all stakeholders to make effective use of the information provided in this publication to support evidence-based policy formulation, strategic planning, and implementation of programs that will further improve educational outcomes in Zanzibar.

I trust that the Zanzibar Education Statistical Abstract 2026 will serve as a useful resource for all those interested in the development of education in Zanzibar.

Lela Muhammed Mussa

Minister of Education and Vocational Training

Zanzibar

Acknowledgement

The preparation of the Zanzibar Education Statistical Abstract 2026 has been made possible through the collective efforts, dedication, and collaboration of many individuals and institutions committed to strengthening the education sector in Zanzibar. This publication represents an important milestone in our ongoing efforts to provide accurate, reliable, and timely education statistics for planning, policy formulation, monitoring, evaluation, and informed decision-making.

The Ministry of Education and Vocational Training extends its sincere appreciation to all education institutions, departments, agencies, district education offices, school administrators, and other stakeholders who provided the data and information used in the compilation of this publication. Their commitment to maintaining and sharing quality data has greatly contributed to the credibility and usefulness of this Statistical Abstract.

Special recognition goes to the Education Management Information System (EMIS) Officers for their tireless efforts in data collection, verification, processing, and management throughout the reporting period. Their dedication to ensuring the availability of accurate and comprehensive education data remains fundamental to the production of this publication. We also acknowledge our colleagues from the Office of the Chief Government Statistician (OCGS) for their analytical expertise, technical guidance, and valuable support in data analysis, interpretation, and presentation, which have significantly enhanced the quality of this Statistical Abstract.

We further express our gratitude to the management and staff of the Ministry of Education and Vocational Training, as well as members of various education institutions and agencies, whose cooperation and professional contributions have made this publication possible.

Finally, we deeply appreciate the continued support of our development partners, including the World Bank, USAID, the Global Partnership for Education (GPE), the Swedish International Development Cooperation Agency (SIDA), UNICEF, and Milele Zanzibar Foundation. Their technical and financial support has played a critical role in strengthening education data systems, evidence-based planning, monitoring and evaluation, and overall education sector development in Zanzibar.

To all who contributed in one way or another to the successful preparation of the Zanzibar Education Statistical Abstract 2026, we extend our heartfelt thanks and appreciation.

Khamis Abdulla Said
Principal Secretary
Ministry of Education and Vocational Training
Zanzibar.

Definitions and Formulas¹

(Cumulative) Dropout Rate (DR)	
<i>Definition</i>	Percentage of a cohort of pupils (or students) enrolled in the first grade of a given level or cycle of education in a given school year who are not expected to reach successive grades.
<i>Formula:</i>	$DR_{g,i}^k = 100 - SR_{g,i}^k$ $DR_{g,i}^k$ = Dropout rate of pupil-cohort g by grade i for a reference year k $SR_{g,i}^k$ = Survival Rate of pupil-cohort g at grade i for a reference year k
Gross Enrolment Rate (GER)	
<i>Definition</i>	Total enrolment in a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school year.
<i>Formula:</i>	$GER_h^t = \frac{E_h^t}{P_{h,a}^t} \times 100$ GER_h^t = Gross Enrolment Rate at level of education h in school year t E_h^t = Enrolment at the level of education h in school year t $P_{h,a}^t$ = Population of age group a which officially corresponds to the level of education h in school year t
Net Enrolment Rate (NER)	
<i>Definition</i>	Enrolment of the official age group for a given level of education expressed as a percentage of the corresponding population.
<i>Formula:</i>	$NER_h^t = \frac{E_{h,a}^t}{P_{h,a}^t} \times 100$ NER_h^t = Net Enrolment Rate at level of education h in school year t $E_{h,a}^t$ = Enrolment of the population of age group a at level of education h in school year t

¹ Source: UNESCO Education Indicators Technical Guidelines
http://uis.unesco.org/sites/default/files/documents/education-indicators-technical-guidelines-en_0.pdf

	$P_{h,a}^t$ = Population in age group a which officially corresponds to level of education h in school year t
Repetition Rate by Grade (RR)	
<i>Definition</i>	Proportion of pupils from a cohort enrolled in a given grade at a given school year who study in the same grade in the following school year.
<i>Formula:</i>	$RR_i^t = \frac{R_i^{t+1}}{E_i^t}$ RR_i^t = Repetition Rate at grade i in school year t R_i^{t+1} = Number of pupils repeating grade i in school year t+1 E_i^t = Number of pupils enrolled in grade i in school year t
Std I Net Intake Rate (NIR)	
<i>Definition</i>	New entrants in the first grade of primary education who are of the official primary school-entrance age, expressed as a percentage of the population of the same age.
<i>Formula:</i>	$NIR^t = \frac{N_a^t}{P_a^t} \times 100$ NIR^t = Net Intake Ratio in school year t N_a^t = Number of children of official school entrance age a who enter the first grade of primary education for the first time in school year t P_a^t = Population of official primary school entrance-age a in school year t
Pupil-teacher ratio (PTR)	
<i>Definition</i>	Average number of pupils (students) per teacher at a specific level of education in a given school year.
<i>Formula:</i>	$PTR_h^t = \frac{E_h^t}{T_h^t}$ PTR_h^t = Pupil-teacher ratio at level of education h in school year t E_h^t = Total number of pupils at level of education h in school year t T_h^t = Total number of teachers at level of education h in school year t
Pupil-classroom ratio (PCR)	
<i>Definition</i> :	Average number of pupils (students) per classroom at a specific level of education in a given school year.

Formula:	$PCR_h^t = \frac{E_h^t}{C_h^t}$ PCR_h^t = Pupil-classroom ratio at level of education h in school year t E_h^t = Total number of pupils at level of education h in school year t C_h^t = Total number of classrooms at level of education h in school year t
Survival Rate by Grade (SR)	
Definition	Percentage of a cohort of pupils (or students) enrolled in the first grade of a given level or cycle of education in a given school year who are expected to reach successive grades.
Formula:	$SR_{g,i}^k = \frac{\sum_{t=1}^m P_{g,i}^t}{E_g^k} \times 100$ $P_{g,i}^t = E_{g,i+1}^{t+1} - R_{g,i+1}^{t+1}$ $SR_{g,i}^k$ = Survival Rate of pupil-cohort g at grade i for a reference year k E_g^k = total number of pupils belonging to a cohort g at reference year k $P_{g,i}^t$ = Promotees from E_g^k who would join successive grades i throughout successive years t R_i^t = Number of pupils repeating grade i in school year t <i>i</i> = grade (1,2,3, ..., n); <i>t</i> = year (1,2,3, ..., m); <i>g</i> = pupil cohort
Transition Rate (TR)	
Definition	The number of pupils/students admitted to the first grade of a higher level of education in a given year, expressed as a percentage of the number of pupils/students enrolled in the final grade of the lower level of education in the previous year.
Formula:	$TR_{h,h+1}^t = \frac{E_{h+1,1}^{t+1} - R_{h+1,1}^{t+1}}{E_{h,n}^t} \times 100$ $TR_{h,h+1}^t$ = Transition rate (from level of education h to h+1 in school year t) $E_{h+1,1}^{t+1}$ = Number of pupils enrolled in the first grade a level of education h+1 in school year t+1 $R_{h+1,1}^{t+1}$ = Number of pupils repeating the first grade at level of education h+1 in school year t+1 $E_{h,n}^t$ = Number of pupils enrolled in final grade n at level of education h in school year t

1. Introduction

1.1 Background and Context

Zanzibar is made up of two main islands, Unguja and Pemba, as well as several smaller islands, some of which have no residents. In 1964, Zanzibar and these islands united with Tanganyika to form the United Republic of Tanzania. Nevertheless, they retained a degree of self-governance and are overseen by the Revolutionary Government of Zanzibar (RGoZ). Education in Zanzibar, as in numerous other nations, is not only a priority but also a cornerstone of the nation's development. The RGoZ is unwavering in its commitment to fostering a robust and inclusive education system that aligns with international agendas, such as the Sustainable Development Goals (SDGs). Both the Zanzibar Development Vision 2050 and the Zanzibar Development Plan (2020-2026) underscore the critical need for educational improvement as a key driver of national development. These visionary documents recognize that quality education is the catalyst for empowering the citizens and propelling the nation forward.

In 2022, the government through the Ministry of Education and Vocational Training (MoEVT) took a significant step towards realizing this commitment by establishing a special task force for education reforms. This task force conducted a comprehensive study of the education system, with the aim of identifying areas that require reform and transformation. The report resulting from this effort has now been completed, and the government is taking decisive action to implement the recommended reforms. Concurrently, the government is in the final stages of reviewing the 2006 education policy, recognizing the need to align the educational framework with the recommended reforms and evolving needs of the society in general. One of the expected pivotal changes on the sector is in the structure of the education system. The government has decided to retain the structure proposed in the 2006 education policy, which follows a 2+6+4+2+3 model. This will phase out the existing 2+7+4+2+3 structure once the double-shift system is eliminated, following the construction of sufficient classrooms to accommodate the growing student population in single shift.

Curriculum reform is also a fundamental aspect of the education improvement agenda in Zanzibar. In line with international best practices,

the country is transitioning from a knowledge-based curriculum to a competency-based one. This approach recognizes that Zanzibar students need skills and competencies to excel in an ever-changing world. The government has already revised the curriculum for both pre-primary and primary education and is now in the process of implementing these changes. The rollout of this curriculum began in early 2023, commencing with Pre-Primary 1, Standard I, Standard IV, and Standard VII, with plans to extend these reforms to other grades in the following year.

To ensure that these far-reaching reforms are effectively incorporated into the broader educational landscape, the government through MoEVT, is diligently developing a sector plan. The plan which set to span seven years up to 2030, will serve as the blueprint for implementing the recommended education reforms. It will provide the framework for achieving the goals and aligning the education system with national development priorities. The data published in this report is therefore a valuable resource that will inform and guide the development of the sector plan, enabling the country to make evidence-based decisions and ensure that the educational efforts are aligned with the aspirations of the nation.

1.2 Structure of Education System in Zanzibar

1.3 Methodology

1.3.1 Scope of Data Collection

The data collection process encompassed all educational institutions throughout the country. Both government and privately owned educational institutions were included in the data collection process, ranging from pre-primary to secondary schools, Karume Institute of Science and Technology (KIST), and universities. The reference date for data collection was set at 28th February. In addition to the Annual School Census (ASC) data, other data were collected from various institutions, such as examination data from the Zanzibar Examination Council (ZEC), education financing data collected from the Ministry of Education and Vocational Training (MoEVT) Accounting Unit, and population data from the Office of Chief Government Statisticians (OCGS).

1.3.2 Annual School Census (ASC)

The Ministry of Education and Vocational Training (MoEVT) conducts the ASC annually through the Department of Policy, Planning, and Research. The data collected through ASC is utilized for the preparation of the budget speech, the annual statistical abstract, and other related statistical publications. In the year 2025, the data collection process spanned nearly a month, commencing from the last week of February to the last week of March. This comprehensive exercise was preceded by an orientation workshop held at the district level for school statisticians across all eleven districts in Zanzibar. The workshop served to refresh the school statisticians on the accurate completion of questionnaires and introduced new questions. Following the training, statisticians were given two weeks to complete the questionnaires and return them to district statisticians for verification. Verified questionnaires from the districts were subsequently sent to the MoEVT Headquarters in Unguja and Pemba for further processing.

1.3.3 Data Processing

The data processing involved several steps to create a clean database suitable for analysis. Initially, data were entered into summary tables within Excel files, each designed for a specific district. To ensure data quality, validation checks were applied to certain tables. Subsequently, data were cross-checked to rectify errors before being compiled into a single Excel database. This validation process extended to sampled schools in each district to verify the accuracy of data provided by schools in the census questionnaires. In cases where doubts or errors arose, some schools were physically visited, or contact was established via mobile phones to

resolve the issues. Once discrepancies were addressed, the final database was generated, and various tables and figures were produced for the report.

1.3.4 Data Limitations

The accuracy of any statistical analysis is only as reliable as the raw data on which it is based. During the preparation of this abstract, it became evident that data from the Education Management Information System (EMIS) and other sources contained limitations. The following subsections provide details on areas where data may be susceptible to errors.

1.3.4.1 Data Entry into Paper Questionnaires

Errors in this category may result from misunderstandings of questions or errors in mental arithmetic that lead to incorrect calculations. Measures have been taken to address this challenge, including training data collectors and double-checking totals once questionnaires reach the district and the Ministry. Schools are contacted if any errors are identified. However, given the time pressure and manual checking, some errors may go unnoticed.

1.3.4.2 Data Processing

Currently, data from questionnaires are processed in Excel. All the required information from questionnaires must be entered into Excel templates. This process has inherent limitations, including the potential for typing errors, especially when dealing with large amounts of data, and the pressure of time, which may result in basic mistakes. Among other issues, not all summations necessarily encompass all schools, and transferring data between Excel workbooks can lead to omitted values or inconsistencies between workbooks. The full operationalization of the School Information System is anticipated to improve data quality by enabling schools to enter data directly into tablets, which automatically calculate key statistics. This approach eliminates the need for data entry into paper questionnaires and processing in Excel. It is also hoped that the annual preparation of this Statistical Abstract will help identify areas where data inconsistencies are most common, facilitating efforts to address these issues.

2. Access

Table 2.1: Summary of Access Indicators by Education Level and Sex, 2026

Indicator	Male	Female	Total
Number of Students in Government Schools			
Pre-primary	32,171	32,203	64,374
Primary	165,558	160,435	325,993
Secondary	68,289	81,472	149,761
Number of Students in Government and Private Schools			
Pre primary	53,899	53,920	107,819
Primary	204,921	200,428	405,349
Secondary	75,043	89,266	164,309
Percent of Standard I (new entrants) with Pre-primary Education (PPE)			
Governments school	20,035	19,570	39,605
Private school	7,726	7,814	15,540
Total	27,761	27,384	55,145
Gross Enrollment Rate (GER)			
<i>Pre-primary</i>	81.1	82.1	81.6
<i>Primary</i>	101.3	99.4	100.4
<i>Secondary</i>	71.5	82.9	77.3
Net Enrollment Rate (NER)			
Pre Primary	67.2	68.9	68.1
Primary	95.6	94.9	95.2
Secondary	42.5	51.3	51.2
Stanard 1 Intake Rate			
Gross Intake Rate (GIR)	106	103.2	104.6
Net Intake Rate (NIR)	62.1	61.3	61.7
Number of students in			
Vocational Training Centres Government (VTC)	1,226	920	2,146
Karume Institute of Science and Technology	1,270	595	1,865
Universities (SUZA, ZU and Sumait)	5,285	8,914	14,199

Figure 4.17: Transition Rate by Grade, 2022-2026⁴93.4

³ The lower transition rates for certain districts are not indicative of students failing to progress to A-level education. Instead, this is due to the presence of fewer A-level classes in those districts. In such cases, students who fulfill the credit requirements for A-level enrollment are typically transferred to schools in districts that provide A-level education. On the other hand, transition rates exceeding one hundred are due to biased students being transferred to districts with the required school biased type.

⁴ It's important to note that the reintroduction of the standard VII in 2022 resulted in a higher required average mark for students to qualify for progression to Form 1. Consequently, nearly half of the students remained in standard 7, significantly influencing the transition rate, which experienced a substantial decline, dropping from 97.3% in 2021 to 46.7% in 2022.

5. Infrastructure and Facilities

⁵ For the year 2024, the count of pre-primary schools within both the government and private schools pertains to standalone pre-primary institutions. However, it is essential to note that pre-primary education is also offered within some of government and private primary and secondary schools, and the combined figures for standalone and integrated pre-primary education are presented in Table 5.4, detailing the total number of schools providing pre-primary education.

Table 5.4: Number of Schools by Type and Level of Education Offered, 2022-2026

6. Quality

Table 6.1: Summary of Quality Indicators by Education Level and School Type, 2026⁶

Indicator	Government	Private
Number of Teachers		
Pre-primary	2,318	2,718
Primary	8,318	4,435
Secondary	6,174	1,490
Pupil Teacher Ratio		
Pre-primary	28	16
Primary	39	18
Secondary	24	10
Standard VII Examination Pass Rate		
Male	93.9	98.1
Female	98.8	99.7
Total	96.4	98.9
Form 2 Examination Pass Rate		
Male	88.0	99.7
Female	96.4	100.0
Total	92.6	99.9
Form 4 Examination Pass Rate		
Male	85.8	98.4
Female	90.9	99.6
Total	88.9	99.1
Pass Rate to Form 5 in Form 4 Examination		
Male	36.7	76.3
Female	34.6	80.4
Total	35.5	78.6
Form 6 Examination Pass Rate		
Male	99.6	100.0
Female	99.8	100.0
Total	99.7	100.0
% of Students with Div I-II from Form 6 Examination		
Male	44.0	40.1
Female	39.0	44.4
Total	41.2	42.7

⁶ The data pertaining to examination results presented in this table correspond to the reference year 2025.

6.1 Teaching and Learning Materials

6.1.1 Textbooks and Pupil Textbook Ratio

Table 6.2: Number of Textbooks in Government Primary and Secondary Schools by Subject and Grade, 2026

Subjects	Primary							Secondary

⁷ In 2019-2021, the National Examination to complete Primary Education took place at Standard VI, which marked the end of the primary education cycle. However, in 2022, due to a policy change extending primary education from six to seven years, the examination for completing primary education now occurs at standard VII, which has become the new end cycle of primary education.
